

Configuring for HWS Dial-up Windows Vista

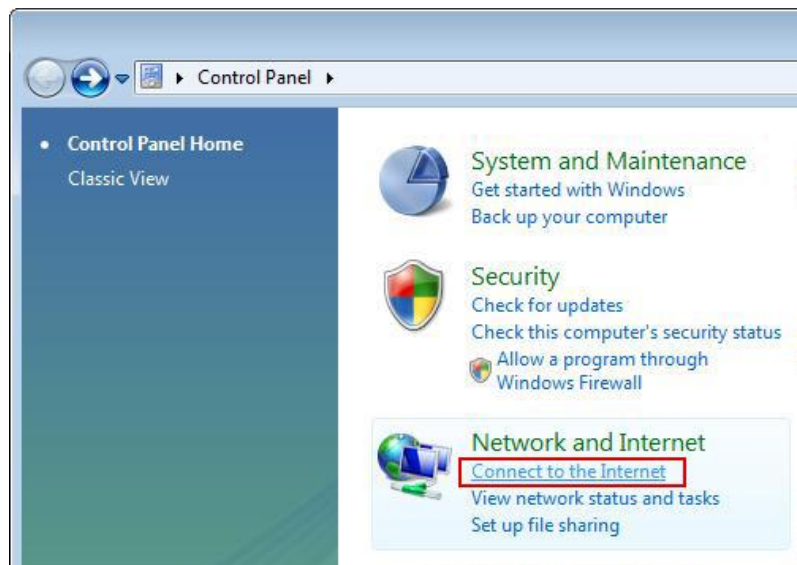

8/21/2007

Please note the daily limit for dial-up connections is four hours per user. Technical reasons prohibit us from making individual changes to this time limit.

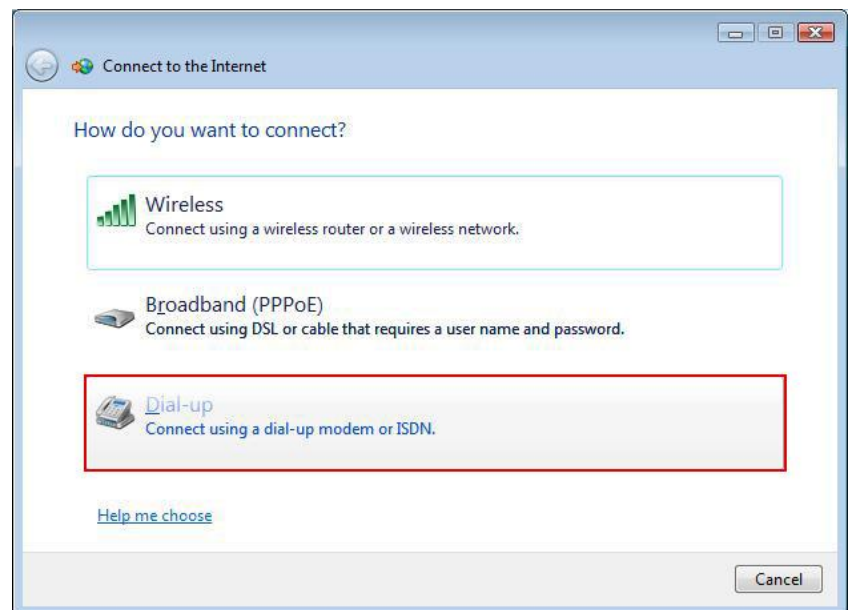

While you are connected, the HWS network may automatically disconnect you if you are not using the Internet to give other users an opportunity to connect.

To configure your computer for HWS dial-up:

1. Click **Start > Control Panel**
2. In the Control Panel, click **Connect to the Internet**

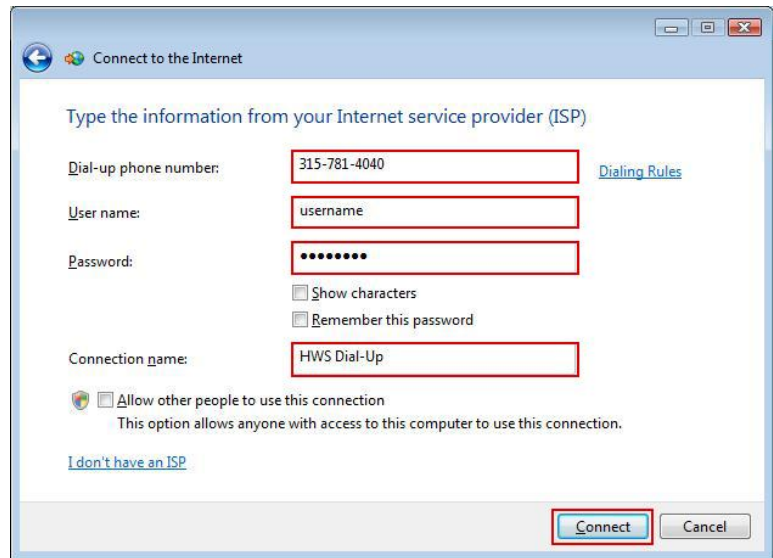

3. In the Connect to the Internet window, under Network Tasks, click **Dial-up**

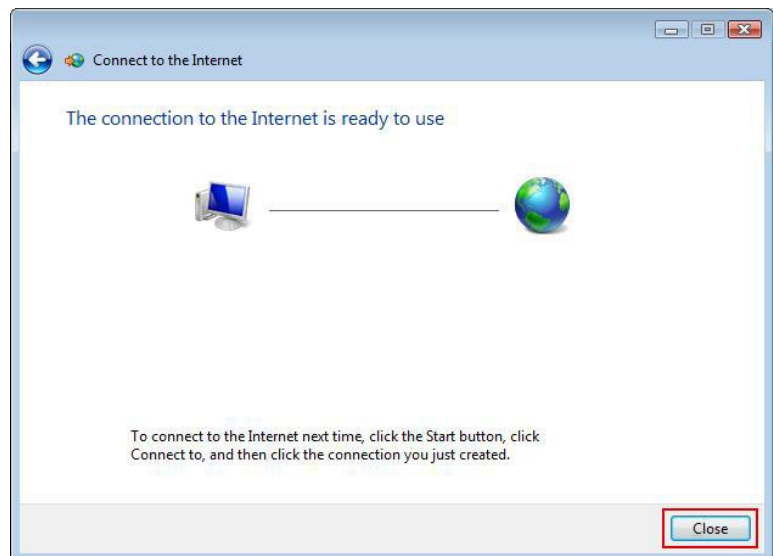

Configuring for HWS Dial-up Windows Vista

8/21/2007

4. At the Information window, enter the campus dial-up number:
 - If Geneva is a local call for you, enter **781-4040** as the number
 - If Geneva is not a local call, you may need to include the area code **315**; please check with your telephone service provider for dialing rules
 - If you intend to use your computer in a hotel, **uncheck** Use area code and dialing rules and enter **9-1-315-781-4040** as the telephone number

5. At the Information window, enter your **HWS username and password**
6. At the Information window, enter a **meaningful name** for the connection
7. Click **Connect**
8. After the connection is configured, click **Close**

If you are having problems, please contact the help desk at ext. 781-4357 or e-mail us at helpdesk@hws.edu.
