

Connecting to the Internet with HWS Dial-up Windows XP Professional

12/14/2006

Please note the daily limit for dial-up connections is four hours per user. Technical reasons prohibit us from making individual changes to this time limit.

While you are connected, the HWS network may automatically disconnect you if you are not using the Internet to give other users an opportunity to connect.

To connect to the Internet through HWS dial-up:

1. Open the connection window
 - Double-click the **shortcut** on your desktop
 - Go to **Start > Connect to > HWS Dial-up**
2. In the connection window, enter your **HWS username** and **password**
3. Click **Dial**

If you have difficulties with these directions or have a problem connecting, please contact the help desk at ext. 4357 or e-mail helpdesk@hws.edu.
